

ABOUT BROADWAY SYSTEMS

Broadway Systems is the only end-to-end, contemporary and proven software platform dedicated to serving the cable networks' advertising business.

Broadway offers an enterprise-wide media planning and management system—from sales, traffic and stewardship through to billing and collections. Broadway Systems' software has been engineered since 2002, is used by several of the top ad-revenue generating networks, managing over \$3 billion in advertising revenues across news, sports, music and entertainment content.

Broadway Systems' mission is to provide solutions that help networks:

- Better serve their advertiser and agency clients;
- Maximize yield on traditional, secondary and non-linear advertising;
- Manage their operation in a cost-effective manner;
- Maintain compliance with Sarbanes-Oxley and company policies.

Broadway offers cable networks a strategic alternative—to existing vendors—that is dedicated solely to their business and keeps pace with the changing needs of this dynamic industry.

THE BROADWAY DIFFERENCE

End-to-End

Manages your entire advertising process
